

I am writing to ask you to please reject the National Association of Broadcasters' petition 04-160 that is trying to stop XM radio from providing Instant Traffic and Weather stations. Living near the Atlanta area, I can benefit from hearing local weather and traffic situations on a regular basis. For people that spend a lot of time in their cars, it's important that they have instant access to this type of information so they can plan for traffic or weather events that might alter their travel. I have been a subscriber to XM radio since February 2004, and in only a few months, I have realized what a great radio service XM provides. Please consider rejecting the National Association of Broadcaster's petition. Thank you.
